Result of examination:

The writing on the photocopy, QC24, is too indistinct for adequate comparison of the Sirhan Sirhan signature and address thereon with the available writings of SIRHAN SIRHAN. If the original document for QC24 or a clearer photograph is submitted, a more suitable examination can be made.

The additional purported handwriting of SIRHAN SIRHAN, designated as specimen K19 is too limited to permit a definite conclusion to be reached whether SIRHAN wrote any of the unidentified questioned writing on the specimens submitted in this matter. It was found that the writing on specimen K19 is of value as an additional handwriting standard of SIRHAN.

Specimens QC24 and K19 are being returned to FBI, Los Angeles. These specimens have been photographed.

Captain DON MARTIN, in charge of the Scientific Investigations Division (SID), Los Angeles Police Department, made available a photograph depicting eight shell casings which came from the .22 caliber Iver-Johnson revolver, allegedly used by SIRHAN B. SIRHAN in the shooting of Senator ROBERT F. KENNEDY.

This photograph depicts seven of the casings in an upright position. One view shows the end of the shell casing with an indentation apparently made by the firing pin of a gun.

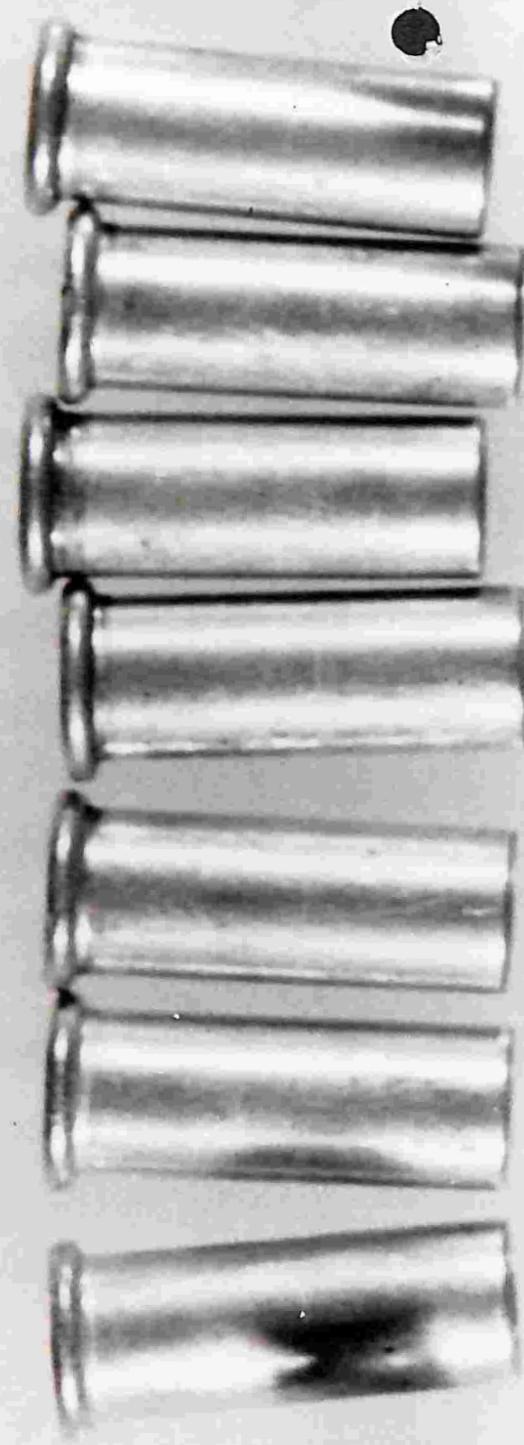

Captain MARTIN also made available one .22 caliber shell casing with the indentation made from the firing pin of the Iver-Johnson .22 caliber revolver allegedly used by SIRHAN. This shell casing is the result of a test firing of that gun.

On June 10, 1968, arrangements were made through the cooperation of Range Officer LLOYD HAGER, San Gabriel Valley Gun Club, 4001 Fish Canyon Road, Duarte, California, to obtain shell casings, more commonly referred to as "brass," from in front of several shooting positions at the gun club.

SA IRVIN B. WELLS, III and SA ROBERT H. MORNEAU, JR. raked the brass with a grass rake which was then sifted through a wire screen to eliminate extraneous materials, such as loose paper, weeds, rocks, dirt, etc.

The "brass" was then packaged by SA WELLS and SA MORNEAU as follows:

- (1) In view of the statements of the range officer, EVERETT BUCKNER, SR., that SIRHAN SIRHAN was shooting in the vicinity of Position Number One and Position Number Two, brass was picked up in the vicinity of Positions One, Two, and Three at the San Gabriel Valley Gun Club, 4001 Fish Canyon Road, Duarte, California, and sealed in a box, marked with those positions. This box weighs seven pounds, ten ounces sealed.
- (2) In view of the statements of a member of the gun club that SIRHAN SIRHAN was shooting in the vicinity of Positions 13 and 14, brass was picked up in the vicinity of Positions 12, 13, 14, and 15 at the San Gabriel Valley Gun Club, 4001 Fish Canyon Road, Duarte, California, and sealed in a box, marked with those positions. On June 10, 1968, at the San Gabriel Valley Gun Club, 4001 Fish Canyon Road, Duarte, California, brass was obtained from a trash barrel and from the ground behind firing position number 1 and packaged as follows:

In view of statements made by range officer EVERETT BUCKNER to the effect that SIRHAN SIRHAN was shooting in the vicinity of gun positions number 1 and 2, brass was obtained from that area by Special Agents GEORGE M. During the investigation concerning the assassination of the late Senator ROBERT F. KENNEDY, a .22 caliber shell casing bearing an indentation made by the firing pin of the Iver-Johnson .22 caliber revolver was made available by Captain DON MARTIN, Scientific Investigations Division (SID), Los Angeles Police Department (LAPD).

Information was developed that SIRHAN SIRHAN practiced shooting at the San Gabriel Valley Gun Club, Duarte, California, on June 4, 1968. In that connection, arrangements were made with LLOYD HAGER, Range Manager, to obtain shell casings which are commonly referred to as "brass" from several of the firing positions at that gun club.

The shell casing made available by Captain DON MARTIN of the LAPD and the shell casings obtained from the San Gabriel Valley Gun Club were forwarded to the FBI Laboratory for comparison purposes in an effort to determine whether or not the indentations made by the firing pin on the shell casings obtained from the San Gabriel Valley Gun Club are identical to the shell casing furnished by Captain MARTIN.

The FBI Laboratory advised on July 5, 1968, that in view of previous firearms examinations conducted by the LAPD and the apparent limited value of the resulting information to this case, the cartridge cases were not examined by the Laboratory and were returned to Los Angeles via Air Express on July 5, 1968.

The cartridge cases were turned over to the LAPD by SA GEORGE M. KLING on July 16, 1968.

1 - General Radio Company - Sound-level meter

1 - 22 caliber Iver Johnson Cadet Model Revolver

1 - Box of Mint-mag ammunition

That he did make an examination and analysis of this evidence and in his opinion:

Sound-level tests were conducted at the Ambassador Hotel between the hours of 11:30/AM and 1:30/PM on this date. A 22 caliber Iver Johnson Cadet Model Revolver was used in these tests, with 22 caliber ammunition which matched the brand and lot used in the assassination.

The test weapon was fired in the Embassy kitchen at the approximate position where Senator Kennedy was shot. The weapon was held horizontal to the floor with the muzzle pointed toward the door at the west end of the kitchen.

A series of one, four and eight shots were fired in each sound test.

During these tests, there were no functions occurring in any of the ballrooms or lobbies (Embassy Room, Sunset Room and Boulevard Room).

several hundred people and a band (Sunset and foyer area) in these rooms, which would further mask out the sound of a weapon being fired in the kitchen.

The sounds of firing the weapon were heard from the lower second level of the northwest, outside stairs of the Embassy Room. The sound-level meter reading indicated a 12-14 decibels change.

The sounds of firing the weapon in the kitchen were not heard from the lower 2nd level of the east west, outside stairway of the Embassy Room. Tests were conducted with the exit door from the Sunset Room both open and closed. Sound level meter readings were 1/2 decibel or less.

DETAILS:

The weapon used in this case was an Iver Johnson, Cadet Model, .22 caliber, 8 shot revolver (2½" barrel). This weapon had eight expended shell casings in the cylinder at the time of recovery from the suspect. A trajectory study was made of the physical evidence which indicated that eight shots were fired as follows:

- #1 - Bullet entered Senator Kennedy's head behind the right ear and was later recovered from the victim's head and booked as evidence.
- #2 - Bullet passed through the right shoulder pad of Senator Kennedy's suit coat (never entered his body) and traveled upward striking victim Schrade in the center of his forehead. The bullet was recovered from his head and booked as evidence.
- #3 - Bullet entered Senator Kennedy's right rear shoulder approximately seven inches below the top of the shoulder. This bullet was recovered by the Coroner from the 6th cervical vertebrae and booked as evidence.
- #4 - Bullet entered Senator Kennedy's right rear back approximately one inch to the right of bullet #3. This bullet traveled upward and forward and exited the victim's body in the right front chest. The bullet passed through the ceiling tile, striking the second plastered ceiling and was lost somewhere in the ceiling interspace.
- #5 - Bullet struck victim Goldstein in the left rear buttock. This bullet was recovered from the victim and booked as evidence.
- #6 - Bullet passed through victim Goldstein's left pants leg (never entering his body) and struck the cement floor and entered victim Stroll's left leg. The bullet was later recovered and booked as evidence.
- #7 - Bullet struck victim Weisel in the left abdomen and was recovered and booked.
- #8 - Bullet struck the plaster ceiling and then struck victim Evans in the head. This bullet was recovered from the victim's head and booked as evidence.

A Walker's H-acid test was conducted on Senator Kennedy's suit coat in the area of the entrance wounds. This test indicated that the muzzle of the weapon was held at a distance of between one to six inches from the coat at the time of all firings.

Powder pattern on Senator Kennedy's ear indicate that the weapon's muzzle was approximately one inch from the ear at the time it was discharged.

The bullet recovered from Senator Kennedy's 6th cervical vertebrae was identified as having been fired from the Iver Johnson revolver recovered from the suspect.

The bullet recovered from Senator Kennedy's head was too badly damaged for comparison purposes.

Sound tests were conducted at the Ambassador Hotel to determine if a weapon fired in the kitchen area could be heard on the east fire escape of the Embassy ball room. Sound level meter reading of approximately 1/2 decibels change indicated that a person would not be able to hear a weapon fired in the kitchen area.
